

USC University of  
Southern California

# Are you friends with a service member or recent veteran?

We invite you to participate in a research study to help us test new technology for adults aged 18 to 86 who are friends or family members to service members or veterans.

- We want to learn if this new technology can help families and friends of service members or veterans recognize potential signs of issues with adjusting to life back at home, and to learn when and how to have conversations about concerns with their loved ones.
- If you agree to participate, you will be asked to complete online surveys and may be invited to play a simulation game at a private location on the USC campus, off campus, or at your home.
- As a token of our appreciation, you will receive up to \$30. Parking at USC can be made available at no cost.
- Your participation is voluntary and any information collected during the study will be kept confidential.
- The simulation game was designed by Soar Technology, Inc.
